Introduction vii

**Algebra** (Topic 1: Algebra)

<b>1 Counting principles</b>	<b>1</b>	<b>1D</b> Counting selections	<b>11</b>
<b>1A</b> The product principle and the addition principle		<b>1E</b> Exclusion principle	<b>15</b>
<b>1B</b> Counting arrangements	<b>1</b>	<b>1F</b> Counting ordered selections	<b>18</b>
<b>1C</b> Algebra of factorials	<b>6</b>	<b>1G</b> Keeping objects together or separated	<b>21</b>
	<b>9</b>		

**Algebra, functions and equations** (Topics 1: Algebra & 2: Functions & equations)

<b>2 Exponents and logarithms</b>	<b>28</b>	<b>5 The theory of functions</b>	<b>118</b>
<b>2A</b> Laws of exponents	<b>28</b>	<b>5A</b> Relations, functions and graphs	<b>118</b>
<b>2B</b> Exponential functions	<b>33</b>	<b>5B</b> Function notation	<b>123</b>
<b>2C</b> The value $e$	<b>39</b>	<b>5C</b> Domain and range	<b>125</b>
<b>2D</b> Introducing logarithms	<b>40</b>	<b>5D</b> Composite functions	<b>131</b>
<b>2E</b> Laws of logarithms	<b>44</b>	<b>5E</b> Inverse functions	<b>133</b>
<b>2F</b> Graphs of logarithms	<b>49</b>	<b>5F</b> Rational functions	<b>141</b>
<b>2G</b> Solving exponential equations	<b>50</b>		
<b>3 Polynomials</b>	<b>58</b>	<b>6 Transformations of graphs</b>	<b>154</b>
<b>3A</b> Working with polynomials	<b>58</b>	<b>6A</b> Translations	<b>155</b>
<b>3B</b> Remainder and factor theorems	<b>63</b>	<b>6B</b> Stretches	<b>157</b>
<b>3C</b> Sketching polynomial functions	<b>68</b>	<b>6C</b> Reflections	<b>161</b>
<b>3D</b> The quadratic formula and the discriminant	<b>76</b>	<b>6D</b> Modulus transformations	<b>163</b>
		<b>6E</b> Consecutive transformations	<b>167</b>
<b>4 Algebraic structures</b>	<b>87</b>	<b>6F</b> Reciprocal transformations	<b>174</b>
<b>4A</b> Solving equations by factorising	<b>87</b>	<b>6G</b> Symmetries of graphs and functions	<b>178</b>
<b>4B</b> Solving equations by substitution	<b>89</b>		
<b>4C</b> Features of graphs	<b>91</b>	<b>7 Sequences and series</b>	<b>190</b>
<b>4D</b> Using a graphical calculator to solve equations	<b>94</b>	<b>7A</b> General sequences	<b>190</b>
<b>4E</b> Solving simultaneous equations by substitution	<b>97</b>	<b>7B</b> General series and sigma notation	<b>193</b>
<b>4F</b> Systems of linear equations	<b>101</b>	<b>7C</b> Arithmetic sequences	<b>195</b>
<b>4G</b> Solving inequalities	<b>110</b>	<b>7D</b> Arithmetic series	<b>199</b>
<b>4H</b> Working with identities	<b>113</b>	<b>7E</b> Geometric sequences	<b>201</b>

<b>7F</b> Geometric series	205	<b>8 Binomial expansion</b>	<b>217</b>
<b>7G</b> Infinite geometric series	207	<b>8A</b> Introducing the binomial theorem	217
<b>7H</b> Mixed questions	211	<b>8B</b> Applying the binomial theorem	219
		<b>8C</b> Products of binomial expansions	223
		<b>8D</b> Binomial expansions as approximations	226
<b>Geometry</b>		(Topics 3: Circular functions & trigonometry & 4: Vectors)	
<b>9 Circular measure and trigonometric functions</b>	<b>232</b>	<b>12 Further trigonometry</b>	<b>346</b>
<b>9A</b> Radian measure	232	<b>12A</b> Double angle identities	347
<b>9B</b> Definitions and graphs of sine and cosine functions	239	<b>12B</b> Compound angle identities	354
<b>9C</b> Definition and graph of the tangent function	248	<b>12C</b> Functions of the form $a \sin x + b \cos x$	359
<b>9D</b> Exact values of trigonometric functions	251	<b>12D</b> Reciprocal trigonometric functions	364
<b>9E</b> Transformations of trigonometric graphs	254	<b>13 Vectors</b>	<b>375</b>
<b>9F</b> Modelling using trigonometric functions	261	<b>13A</b> Positions and displacements	375
<b>9G</b> Inverse trigonometric functions	264	<b>13B</b> Vector algebra	384
		<b>13C</b> Distances	389
<b>10 Trigonometric equations and identities</b>	<b>273</b>	<b>13D</b> Angles	393
<b>10A</b> Introducing trigonometric equations	273	<b>13E</b> Properties of the scalar product	397
<b>10B</b> Harder trigonometric equations	281	<b>13F</b> Areas	402
<b>10C</b> Trigonometric identities	291	<b>13G</b> Properties of the vector product	404
<b>10D</b> Using identities to solve equations	297	<b>14 Lines and planes in space</b>	<b>413</b>
<b>11 Geometry of triangles and circles</b>	<b>304</b>	<b>14A</b> Vector equation of a line	413
<b>11A</b> Right-angled triangles	305	<b>14B</b> Solving problems with lines	420
<b>11B</b> The sine rule	307	<b>14C</b> Other forms of equation of a line	432
<b>11C</b> The cosine rule	312	<b>14D</b> Equation of a plane	439
<b>11D</b> Area of a triangle	318	<b>14E</b> Angles and intersections between lines and planes	449
<b>11E</b> Trigonometry in three dimensions	321	<b>14F</b> Intersection of three planes	457
<b>11F</b> Length of an arc	326	<b>14G</b> Strategies for solving problems with lines and planes	463
<b>11G</b> Area of a sector	330		
<b>11H</b> Triangles and circles	333		

## Algebra

(Topic 1: Algebra)

<b>15</b>	<b>Complex numbers</b>	<b>476</b>	<b>15E</b>	Sums and products of roots of polynomials	498
<b>15A</b>	Definition and basic arithmetic of $i$	476	<b>15F</b>	Operations in polar form	504
<b>15B</b>	Geometric interpretation	482	<b>15G</b>	Complex exponents	510
<b>15C</b>	Properties of complex conjugates	487	<b>15H</b>	Roots of complex numbers	512
<b>15D</b>	Complex solutions to polynomial equations	493	<b>15I</b>	Using complex numbers to derive trigonometric identities	517

## Calculus

(Topic 6: Calculus)

<b>16</b>	<b>Basic differentiation and its applications</b>	<b>527</b>	<b>18</b>	<b>Further differentiation methods</b>	<b>599</b>
<b>16A</b>	Sketching derivatives	527	<b>18A</b>	Differentiating composite functions using the chain rule	599
<b>16B</b>	Differentiation from first principles	535	<b>18B</b>	Differentiating products using the product rule	604
<b>16C</b>	Rules of differentiation	538	<b>18C</b>	Differentiating quotients using the quotient rule	607
<b>16D</b>	Interpreting derivatives and second derivatives	541	<b>18D</b>	Implicit differentiation	611
<b>16E</b>	Trigonometric functions	547	<b>18E</b>	Differentiating inverse trigonometric functions	616
<b>16F</b>	The exponential and natural logarithm functions	549	<b>19</b>	<b>Further integration methods</b>	<b>622</b>
<b>16G</b>	Tangents and normals	550	<b>19A</b>	Reversing standard derivatives	622
<b>16H</b>	Stationary points	554	<b>19B</b>	Integration by substitution	626
<b>16I</b>	General points of inflexion	560	<b>19C</b>	Using trigonometric identities in integration	634
<b>16J</b>	Optimisation	562	<b>19D</b>	Integration using inverse trigonometric functions	641
<b>17</b>	<b>Basic integration and its applications</b>	<b>569</b>	<b>19E</b>	Other strategies for integrating quotients	644
<b>17A</b>	Reversing differentiation	569	<b>19F</b>	Integration by parts	649
<b>17B</b>	Constant of integration	571	<b>20</b>	<b>Further applications of calculus</b>	<b>659</b>
<b>17C</b>	Rules of integration	572	<b>20A</b>	Related rates of change	659
<b>17D</b>	Integrating $x^{-1}$ and $e^x$	575	<b>20B</b>	Kinematics	663
<b>17E</b>	Integrating trigonometric functions	576	<b>20C</b>	Volumes of revolution	668
<b>17F</b>	Finding the equation of a curve	577	<b>20D</b>	Optimisation with constraints	674
<b>17G</b>	Definite integration	579			
<b>17H</b>	Geometrical significance of definite integration	581			
<b>17I</b>	The area between a curve and the $y$ -axis	588			
<b>17J</b>	The area between two curves	591			

## Probability and statistics

(Topic 5: Statistics & probability)

<b>21 Summarising data</b>	<b>689</b>	<b>23 Discrete probability distributions</b>	<b>743</b>
21A Some important concepts in statistics	689	23A Random variables	743
21B Measures of spread	691	23B Expectation, median and variance of a discrete random variable	747
21C Frequency tables and grouped data	695	23C The binomial distribution	751
<b>22 Probability</b>	<b>705</b>	23D The Poisson distribution	758
22A Introduction to probability	705	<b>24 Continuous distributions</b>	<b>769</b>
22B Combined events and Venn diagrams	711	24A Continuous random variables	769
22C Tree diagrams and finding the intersection	715	24B Expectation and variance of continuous random variables	773
22D Independent events	720	24C The normal distribution	777
22E Counting principles in probability	722	24D Inverse normal distribution	783
22F Conditional probability	724		
22G Further Venn diagrams	727		
22H Bayes' theorem	732		

## Algebra

(Topic 1: Algebra)

<b>25 Mathematical induction</b>	<b>791</b>		
25A The principle of mathematical induction	791		
25B Induction and series	793		
25C Induction and sequences	795		
25D Induction and differentiation	799		
25E Induction and divisibility	801		
25F Induction and inequalities	803		
<b>26 Questions crossing all chapters</b>			<b>809</b>
<b>Examination tips</b>			<b>820</b>
<b>Answers</b>			<b>821</b>
